

Pixel Resolution

* One convention for describing size is by pixel resolution, with width as columns of pixels and height as rows of pixels.

Video Screen Proportion	Ratio	* Pixel Resolution	
		Width (px)	Height (px)
4 x 3	1.33:1	240	180
		360	270
		480	360
		640	480
		720	540
		800	600
		1024	770
		1280	960

3 x 2	1.5:1	240	160
		360	240
		480	320
		640	425
		720	480
		800	535
		1024	680
		1280	850

16 x 9	1.77:1	240	135
		360	203
		480	272
		640	360
		720	407
		800	450
		1024	580
		1280	720

** Another convention describes pixel resolution per unit of length. For example, pixels per inch (PPI).

PPI	Usage
72	Web, resolution on computer monitor
120	PowerPoint resolution of images
300	Minimum resolution for best quality printing
